

Fall Semester 2011

EPSY 5101-001
Intelligence and Creativity
Internet-delivered

Class # 16931

3- Credits

(09/07/2010 - 12/15/2010), OFFCMPTC

This is a semester-long online course with an initial optional on-campus meeting TBA. Contact the instructor if you cannot attend or for more information.

Description: This course is intended to serve students (graduate, undergraduate, and adult special) interested in intelligence and creativity. The course will feature an examination of theories of intelligence and creativity and perspectives on the assessment and development of intelligence and creativity. Implications for educational practices, psychological research, and the professions and disciplines will also be studied. Attention will be provided to the role of interventions intended to enhance intellectual abilities and creativity and to relevant brain research on creativity and intelligence. The primary readings for the course will be one contemporary paperback text on creativity and one contemporary paperback text on human intelligence. This course will emphasize writing in the evaluation of student performance. Students will work in small groups to complete 4 group discussion short answer essay questions. Students will learn early in the course the essay questions to be used in the course. Students will also complete 4 objective quizzes to assess comprehension of the text and module material. Each student will complete a critical review of one scholarly article or book chapter, with either the article or the text chapter to be selected by the student, and one final paper. The course will be "Web Enhanced."
