

STEM & the K-12 Gifted Learner

MEGT 20th Mid-Winter Conference

February 5-7, 2012

Conference information at: www.megt.org

Meet one of our keynote speakers:

Technology—Brian Housand

Several of us have heard Brian Housand present at NAGC. We have all come away with numerous practical ideas to implement technology in the classroom. We are excited to have Brian be one of our keynote speaker for our 20th annual conference. Brian is currently an Assistant Professor at East Carolina University in the department of Curriculum and Instruction. He earned his Ph.D. from the University of Connecticut in 2008 with an emphasis in both gifted education and instructional technology. Brian is the current chair of NAGC's Computers and Technology network, and writes the Untangling Technology column for Teaching for High Potential. Brian is an expert in examining the intersection of giftedness, technology, and creativity in the digital age. He focuses on exploring ways in which technology can enhance the learning environment.
